ESB has officially opened a 150MW (300MWh) battery energy storage system (BESS) at its Aghada site in County Cork, marking a major milestone in Ireland's renewable energy infrastructure.

SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) project in Ireland's Midlands from UK-based renewable energy ...

The project is the latest step in ESB's commitment to investing EUR300 million (&#163;251 million) in battery storage technology. Its first BESS site launched in 2022, a 19MW/38MWh project also ...

The acquisition of the Offaly project, which began development in 2018 under UK-based Low Carbon, will bring SSE's secured battery pipeline in Ireland to 300MW.

More than 700 megawatt (MW) of battery storage was active at the end of 2023 and another 500 MW has been contracted to connect over the next five years. These storage systems ...

The final delivery of the project is subject to a final investment decision by SSE. The utility expects to launch construction in 2026 and energise the battery in 2028.

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery ...

Ireland is an excellent starting point for RWE Renewables as we look to expand and grow our battery storage technology business and become a key partner in Ireland's low carbon energy transition. ...
