In just two years, Ireland's installed solar capacity has increased by 159.8%. When we launched our first Scale of Solar report in 2023, solar energy in Ireland was still emerging. But today, it's undeniable: ...

Excess wind or solar power can feed into batteries in our homes and cars, or at utility scale it can be diverted to short-term storage or to power pumped hydro generation. Electrifying everything ...

Today's conference heard from a range of stakeholders across the renewable sector, discussing the potential role of energy storage in the Irish energy transition, and the rapidly emerging ...

Eir Solus develops stand-alone battery storage systems as well as hybrid energy systems that link battery storage with wind and/or solar plants. Batteries are an important building block of the energy ...

Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery storage has the potential to provide secure,...

Modern battery technology now enables Irish homeowners to capture and store excess solar energy during sunny periods, providing reliable power even during our cloudy winters and long ...

Minister for Climate, Energy and the Environment Darragh O'Brien and Minister of State with responsibility for Fisheries and the Marine Timmy Dooley have today highlighted Ireland's ...

By addressing key areas such as market access, technical standards, and funding mechanisms, the Policy aims to provide a realistic framework for achieving Ireland's renewable ...
