-----  
Can Ireland encourage energy storage?

In a bid to incentivise the creation of energy storage in Ireland, the government is developing a policy framework to help deliver their objectives in this area of its Climate Action Plan which is targeting a proportion of renewable electricity to up to 80% by 2030.

Why is Ireland launching a policy framework for energy storage?

The Irish government has launched a consultation to help direct the development of a policy framework for energy storage. As the renewable energy generation market continues to grow in Ireland there is an increasing urgency to develop energy storage solutions in a bid to provide flexibility to the energy market.

When will long duration energy storage be available in Ireland?

The Irish Electricity Storage Policy Framework, published after this data was collected, indicates that an immediate route to market for 500 MW of long duration energy storage is currently being developed, with further studies planned to support long duration storage from 2030 to 2040 (Government Of Ireland 2024a).

What is energy storage Ireland (ESI)?

1. Introduction Energy Storage Ireland (ESI) is a representative association of over 70 public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland.

EirGrid launches consultation on the Long Duration Energy Storage Procurement Mechanism Ireland's energy sector is undergoing a crucial transformation, with EirGrid's October ...

A 50MW short-duration battery storage project in County Meath, Ireland. Image: Iberdrola. The Irish government has launched a consultation to help direct the development of a policy ...

With a recent policy statement, Ireland is seeking to accelerate the growth and integration of battery and other storage systems into Ireland's electricity grid.

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030.

The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key stakeholders and ...

EirGrid has launched its consultation on a proposed procurement mechanism and associated operational considerations to facilitate the introduction of long duration electricity storage ...
