---

What follows are the top 10 solar power plants that are actually operational and verifiably producing power as of 2025. No speculative or half-built megaprojects and planned expansions. ...

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Experience the power of Goal Zero by improving your lifestyle with our portable power stations, solar generators, solar panels, power banks, and home energy storage solutions.

Explore the 5 Largest solar power plants from around the world. From systems in China, India and the United States.

Electrical workers use a boat to check on solar panels at a photovoltaic power station built in a fishpond in Hai'an, in China's eastern Jiangsu province, on July 19, 2021.

On this page, you can explore our real-time database of solar farms in the US. Each month, we track solar projects in the state and update our list of the largest solar farms in the US.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid.
