When you use a solar panel system -- also called a photovoltaic or PV system -- to produce power for your home, you won't have to buy as much electricity from the utility company, and you get the ...

While there is not a universal solar energy solution, in this guide you will find some resources that can help you decide what's best for you. Consider these questions before you go solar: Is Solar for Me? ...

So you've got some shiny solar panels on your roof and you're making a lot of your own electricity. Your power bills are nearly eliminated and you're feeling like an environmental champion. Then one windy ...

Can a solar energy system be built for a house without electricity? Yes, a very common OFF GRID solar energy system can be installed in a house without electricity.

Homes without conventional electrical systems may be permitted if they utilize alternative energy sources like solar panels and meet safety criteria. Local habitability standards determine ...

You will probably still have an electric utility bill after going solar. Most homeowners need power from the grid at night and when their panels aren't producing enough electricity.

Since solar panels don't generate power at night, you'll need to rely on your utility for electricity after sunset. Will you still have a utility bill after you go solar? Don't let pushy solar salespeople fool you -- ...

Home solar power can lower your electric bill for years to come, but you're still likely to get one, even after your panels are up and running. Here's why, and how solar panels can make it ...
