Israeli renewable energy developer Enlight has won grid connection rights for 300 MW of battery storage capacity in a national tender, enabling the construction of systems that can store ...

The Yesha project (est. 2024) is a first of its kind agro-solar platform that optimizes land use to produce high-yield agriculture alongside reliable green electricity.

To help Israel's industrial and commercial energy transition, GSL Energy and Deye have jointly created a highly efficient and flexible energy storage demonstration project.

Explore how 350+ Israeli energy tech startups are shaping decarbonization, grid modernization, and storage innovation with data from Finder.

This article explores cutting-edge battery technologies, policy frameworks, and real-world applications shaping Israel's energy storage landscape - crucial reading for solar developers, utility operators, ...

To spotlight real-world impact, here are six standout cases in Israel's C& I energy storage landscape, showcasing diverse applications from utility-scale hybrids to BTM solutions:

Overview May 4, 2023: Planning chiefs in Israel have approved a blueprint for an 800MW/3,200MWh energy storage park comprising a variety of ESS technologies, the government announced on May 2.

On January 2, 2025, GSL Energy completed the deployment of a 50kWh high voltage energy storage system with Deye three-phase inverters at a business park in Israel. As a global leader in solar ...
