HiTHIUM and El-Mor Renewable Energy form a strategic partnership to develop 1.5GWh of long-duration battery storage projects, enhancing grid stability and solar integration in Israel.

Israel's battery storage market is shifting from concept to execution. With strong policy backing, major utility-scale projects underway, and a vibrant innovation ecosystem, the country is...

Advanced Battery Chemistry: Israeli researchers are developing novel battery compositions that dramatically increase energy density while reducing production costs. These ...

To help Israel's industrial and commercial energy transition, GSL Energy and Deye have jointly created a highly efficient and flexible energy storage demonstration project.

The Israeli Electricity Authority (IEA) has awarded contracts for 1.5 GW of high-voltage battery storage across 11 projects in a recent tender. The awarded facilities will be developed in ...

Under the partnership, El-Mor will design and construct battery energy storage systems (BESS) and related infrastructure for multiple projects totaling 1.5GWh capacity and 300MW power ...

As the importance of energy storage for grid stability grows, ...

Sodium-based batteries for storing renewable energy cheaply and the recycling of lithium-ion batteries are among the challenges to be researched at a new NIS 130 million (\$37 million)...
