---

By 2030, Ivory Coast has pledged to increase its share of renewable energy to 45 percent, including nine percent solar, and to reduce its greenhouse gas emissions by 30 percent.

IFC and the Government of Côte d'Ivoire today announced Infinity Power Holding as the winning bidder to design, finance, build, and operate two grid-connected solar PV plants in Côte d'Ivoire ...

The plant, launched in June 2023, spans 36 hectares and boasts 68,000 solar panels. Plans aim to double capacity to 80 MWp by 2024, funded by local, German, and EU sources.

With ambitions to derive nearly half of its energy from renewable sources by 2030, Ivory Coast charts a course toward sustainability in a continent where, despite abundant solar potential, ...

Ivory Coast's first solar power plant represents a significant step towards a greener and more resilient energy future. By reconciling economic development and environmental protection, the country is ...

The initiative follows the April 2024 inauguration of Ivory Coast's first solar plant - and the largest in West Africa - in Boundiali. Ivory Coast currently has 15 solar projects totaling 650 MW currently ...

It has been in operation since July 2023. Our RMT experts were in charge of all the work, and also installed a Battery Energy Storage System (BESS) enabling CI-ENERGIES to even out ...

The Bondoukou Solar PV power plant will generate 85 GWh of clean energy, powering approximately 358,000 households, and will offset more than 52,000 tons of CO2 emissions. The ...
