What is Japan's first energy storage project? In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, ...

This groundbreaking project, in collaboration with ENEOS Corporation, aims to enhance grid stability and support renewable energy production, showcasing the rapid advancements in battery technology.

Japan Petroleum Exploration Co., Ltd. (JAPEX) announces that it has started construction of its first grid-scale battery (*1) facility (hereinafter the "Battery Energy Storage ...

After more than a decade of experiment, we developed the EV Battery Station, a large-scale energy storage system that combines hundreds of reused batteries to provide high output and capacity so ...

Despite strong policy signals, Japan's energy storage rollout faces deep structural headwinds. The nation's split-grid architecture--50 Hz in the east and 60 Hz in the west--limits ...

These storage systems are equipped with the "LEPS-2-14" lithium-ion battery for industrial use which is manufactured by GS Yuasa. The receipt of this order was secured as a result ...

This report aims to provide an overview of the early-stage grid-scale battery storage business in Japan, identify key challenges, and outline the direction of future development.

Japan's storage containers aren't just metal boxes - they're climate chess pieces. With 2030 targets looming (36-38% renewables mix), these systems could be the grid flexibility game-changer.
