XL Batteries has secured backing to commercialize flow battery systems which use an organic electrolyte, rather than vanadium, and two utility-scale developers have landed extensive ...

Flow batteries are emerging as a transformative technology for large-scale energy storage, offering scalability and long-duration storage to address the intermittency of renewable energy ...

Discover 10 emerging new flow battery companies to watch in 2026 & find out how their solutions will impact your business!

A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long-duration, utility-scale energy storage.

Recently, the 500 MW/2 GWh Xinhua Wushi project, integrating lithium iron phosphate and vanadium flow batteries, began its first phase of operations. Once completed, it will be the ...

Technology provider Dalian Rongke Power (Rongke Power) and infrastructure developer China Three Gorges Corporation (CTG) have brought online the world's first gigawatt-hour-scale flow ...

The newly announced 10-year agreement brings a five megawatt (MW), 50 megawatt-hour (MWh) iron flow battery system--known as Project New Horizon--to SRP's Copper Crossing ...

In May of 2024, the agency engaged Invinity to install its flow batteries at six sites in the US on a demonstration basis, under the code name "Mistral." As of late last year, the project was...
