Explore the latest milestones in U.S. utility-scale solar projects, from Texas to Colorado, showcasing mega farms driving renewable energy growth.

With portable solar panels and energy storage, construction companies can produce renewable power on-site, thereby eliminating or greatly reducing their reliance on diesel generators ...

Search all the announced and upcoming solar photovoltaic (PV) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in United States (US) with our comprehensive online database.

The utility-scale data covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities greater than ...

The latest release includes data on 5,712 facilities covering 49 states (plus the District of Columbia). The most recent facilities added to the USPVDB became operational as recently as the third quarter of 2024.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Since 2020, DOE's Energy Information Agency has hosted an interactive database with coordinates of the central point of large-scale solar facilities.

The U.S. Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. front-of-the-meter, photovoltaic facilities, direct current capacity of 1 megawatt or more, that became ...
