Are Bess systems the key to modernizing Malta's distribution network?

She emphasized that initiatives like these are vital steps toward large-scale renewable projects, such as offshore wind. Dr. Ing. Joseph Vassallo, Divisional Manager at ICM, highlighted that the BESS systems are key to modernizing Malta's distribution network.

Why is the Bess project important for Malta?

Interconnect Malta divisional manager Joseph Vassallo said the BESS project was an important milestone for Malta as it would contribute to modernise its distribution network with the installation of large power-electronic converters connected to Malta's 33kV system for energy conversion and flexibility services.

What is a Bess system?

The BESS systems will enable the storage of surplus energy generated by photovoltaic panels during periods of low demand. This stored energy will then be used when demand peaks, helping to maintain the stability of Malta's electrical grid.

How does the Bess project affect PV generation in Malta?

The BESS project is also intended to mitigate weather-related challenges posed by renewable energy sources, which are reliant on climatic conditions and can therefore lead to significant dips in generation during moments of sudden cloud coverage severely affecting the PV generation in Malta.

In a statement announcing the tender, Interconnect Malta said the BESS project would help ensure a more stable and reliable energy supply while making it possible to ramp up the share of...

InterConnect Malta has announced the launch of tenders for the design and construction of two large-scale Battery Energy Storage Systems (BESS).

The document outlines the implementation of utility-scale Battery Energy Storage Systems (BESS) at Malta's Marsa A-Station and Delimara Power Station, aimed at enhancing grid stability and ...

Armed with the best quality power quality analysis equipment, we cater for all services related to electrical power, such as inconsistent mains supply, flicker, voltage swells or dips, and harmonics, etc.

Both projects will cost around EUR 47 Million and will be funded by the ERDF and RRF. BESS presents an important potential contribution for Malta to achieve its EU decarbonisation commitments and feature ...
