Is electric mobility inevitable in Sub-Saharan Africa?

The electric vehicle (EV) revolution is sweeping the world, and Sub-Saharan Africa (SSA) is no exception. Despite the environmental and sustainability narratives surrounding EVs, it is now undeniable that the transition to electric mobility is inevitable.

How many EVs are there in South Africa?

South Africa, which boasts the most advanced e-mobility market in SSA, only had approximately 1000 EVs in circulation in 2022, out of a total fleet of 12 million vehicles . Kenya, on the other hand, had an estimated 350 EVs, with around 2.2 million registered vehicles in use across the country .

How much does an EV cost in South Africa?

However, most EVs available in South Africa are from high-end brands, with models starting at well over US\$100,000. The average price difference between ICE (US\$25,000) and EV (US\$111,000) is US\$86,000.

Should South Africa switch to EVs?

A survey report revealed that over 70 % of South Africans would consider switching to EVs if they had access to models costing less than US\$30,000 . However, most EVs available in South Africa are from high-end brands, with models starting at well over US\$100,000.
