Where is Tesla's gigawatt-hour-scale energy storage station located?

The gigawatt-hour-scale energy storage station is to be located in the Lin-gang Special Area of China (Shanghai) Pilot Free Trade Zone, as per the deal signed by Tesla, the administrative committee of the Lin-gang Special Area, the people's government of Shanghai's Fengxian District, and China Kangfu International Leasing Co., Ltd.

Will Tesla build a grid-side energy storage station in Shanghai?

SHANGHAI, June 21 (Xinhua) -- U.S. carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries.

How much power does a Megapack provide?

One Megapack can provide up to 1 megawatt of power for four hours. "The grid-side energy storage power station is a 'smart regulator' for urban electricity, which can flexibly adjust grid resources," Tesla said on Weibo, according to a Google translation.

When will the Megapack energy storage plant start production?

Dedicated to producing the large-scale Megapack energy storage systems, the new factory is expected to begin mass production in the first quarter of 2025. The megafactory will boast a substantial production capacity, aiming for an annual output of 10,000 Megapack units, which equates to approximately 40 GWh of energy storage.
