Is solar a lifeline for migrant workers?

Many migrant workers across the dusty interiors of western Uttar Pradesh - Hathras, Bulandshahr, Aligarh - embraced solar as a lifeline to meet their energy needs but are now finding themselves disillusioned.

How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$51,860 in May 2024. Employment of solar photovoltaic installers is projected to grow 42 percent from 2024 to 2034, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.

How do I become a solar photovoltaic installer?

There are multiple paths to becoming a solar photovoltaic (PV) installer, or PV installer. These workers typically need a high school diploma, but some take courses at a technical school or community college; they also receive on-the-job training lasting up to 1 year. Some PV installers learn to install panels as part of an apprenticeship.

Why are solar panels not being used in rural areas?

"In rural, off-grid areas, the panels often face poor air quality, dust, bird droppings, and no guidance on upkeep. After a year or two, many just abandon them," he added. Shopkeepers in surrounding areas like Pilakhana and Bijauli also report declining use.

While immigrant workers can be found in all sectors, they're particularly prevalent in fields that are helping to drive clean energy technology and innovation -- including the solar industry.

The Solar Industry and Immigrants Challenges Immigrants Face For Employment Solar Energy Job Resources For Immigrants Immigrant and Minority-Owned Energy and Solar Companies Why Should You Support Immigrant-Owned Businesses?
