The Omburu Energy Storage Project is located in central northern Namibia, with a designed storage capacity of 51 megawatt hours. It can release electricity to the grid during peak ...

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now account for ...

As southern Africa's first mover in grid-scale storage, Namibia's not just solving its own energy puzzle. They're creating a replicable model for the continent's \$12B storage market - and honestly, that's the ...

The shipment, according to the national utility NamPower, arrived on Tuesday at the port of Walvis Bay, and includes eight Power Conversion System (PCS) containers that will convert ...

Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't just a ...

Located near Omaruru, the Omburu BESS Project will provide 51MW/51MWh of capacity using lithium-ion (LFP) battery technology. Once operational, it will allow electricity to be stored for ...

The project features a 45 MW / 90 MWh BESS facility, representing the country's largest battery, and is part of the broader Transmission Expansion and Energy Storage (TEES) program.

According to the national utility NamPower, the shipment successfully arrived on Tuesday at the Port of Walvis Bay. The cargo includes eight specialized Power Conversion System (PCS) ...
