Small Bahamian retail investors will have the chance in early 2025 to invest up to \$20m in the facility that will supply vessels at Nassau Cruise Port with 60 mega watts (MW) of power, it was...

Once commissioned, the mini LNG terminal will be capable of receiving LNG through smaller ships, as well as reloading of LNG in ISO containers to service LNG users in the area.

The terminal's modular design allows it to support LNG distribution via smaller ships and ISO containers, extending LNG access for diverse energy needs throughout The Bahamas.

The terminal, which will store 15,000 m³ of LNG, will provide natural gas to IPP's 60 MW power plant, supplying shore power to cruise ships docked at Nassau Cruise Port. The facility is set ...

INOX India Ltd has been awarded a major contract by Island Power Producers Ltd for the turnkey design, engineering, and supply of a mini LNG receiving and regasification terminal at The ...

Synopsis: INOX India Ltd has secured its largest order yet to build a mini LNG terminal in The Bahamas for Island Power Producers Ltd. This facility will enhance sustainable energy access ...

The terminal is expected to serve as a model distribution hub for smaller LNG users, supporting power generation and other energy needs across The Bahamas. Moreover, the contract ...

Since 2018, Shell and Bahamas Power & Light (BPL) have been contemplating construction of a LNG terminal near BPL's Clifton Pier Power Station on the west coast of Nassau.
