Is 5G regulated in the Netherlands?

There is no specific legislation surrounding the roll-out of 5G in the Netherlands. The Telecommunications Act does contain rules on the issuance of frequencies and the sharing of antenna sites. 6. Are 5G network sharing or spectrum sharing agreements in place? Is there any focused 5G network or spectrum sharing regulation?

What does 5G mean for the Netherlands?

The introduction of 5G means the Netherlands will continue to have a fast and stable mobile network in the future. Mobile data usage is increasing. For example, people now watch films while travelling. And farmers' drones, industrial machinery and self-driving cars all use mobile data.

What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

Will the Netherlands free up more frequency space for 5G?

Since several years the Dutch authorities were working on freeing up more frequency space for 5G. As far back as 2021, the Dutch Minister of Economic Affairs and Climate Policy (Minister) decided to amend the National Frequency Plan 2014 (NFP) to free up the 3.5 GHz band for the development of the 5G network from 1 September 2022 onwards.
