The showcase features the newly launched AI containerized data center solution designed for edge computing. This 20-foot container, which integrates power, cooling, and IT ...

1RU 33kW Power Shelf: Delta has taken the lead in launching the new 19-inch 33kW AC/DC Power Shelf, designed to meet the power supply needs of the NVIDIA Blackwell platform in ...

This new approach not only addresses the power demands of modern AI chips like NVIDIA's Blackwell platform but also sets a new standard for sustainable and scalable data center ...

ATESS's high-quality, efficient and sustainable DC Cabinet provides seamless integration, intelligent monitoring and other powerful features that pave the way for a sustainable and energy independent ...

To address this, data centers are exploring the integration of both high-efficiency AC and 400V DC rack power distribution by leveraging mSiC(TM) technology to optimize power conversion, ...

By adopting direct 800 V input, compute racks can efficiently handle power delivery without relying on integrated AC/DC conversion stages. These racks accept two conductor 800 V ...

A rack mountable battery backup is a compact, scalable power storage system designed to integrate into server racks. It provides uninterrupted power during outages, ensuring critical edge computing ...

Delta presents comprehensive solutions at COMPUTEX 2025. Ping Cheng, Delta's Chairman and CEO (right 3) and representatives from business groups attend the trade show.
