New Delhi Tariffs by the United States on solar imports have dealt a heavy blow to Indian solar module exporters, forcing manufacturers to redirect volumes back into the domestic market, ...

The report shows that India's solar module exports rose nearly nine times in 2023 and doubled again in 2024. It notes that this shift positions India as a credible alternative supplier in the...

New Delhi [India] November 6 (ANI): Tariffs by the United States on solar imports have dealt a heavy blow to Indian solar module exporters, forcing manufacturers to redirect volumes...

The full weight of a 50 percent tariff on Indian goods took effect this week, undercutting one of the country's most promising markets for solar exports.

The stricter trade measures have contributed to a sharp contraction in India's solar module exports, which fell to their lowest level this year in September.

The India-US trade deal enhances the cost-competitiveness of Indian-made solar cells and modules and will create a substantial new demand for high-efficiency domestic products.

New Delhi exported \$25 million worth of photovoltaic cells that were not assembled into modules or turned into panels during April-October FY25, with 90% of these exports directed to the US.

New Delhi: The country's exports of photovoltaic modules or solar panels rose by 30.7 per cent to USD 932 million during April-October period this fiscal year, according to the commerce...
