Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Our solar containers reduce installation time from months to just days, minimizing labor costs and project delays. Built to withstand extreme temperatures (-40°C to +70°C), sandstorms, humidity, and ...

Among the innovative solutions paving the way forward, solar energy containers stand out as a beacon of off-grid power excellence. In this comprehensive guide, we delve into the ...

The Plaza Solar Charging Station combines seating and device charging into a single solar-powered bench. Designed for parks, campuses, promenades, and pedestrian corridors, it adds functional ...

What is New Energy Integration Charging Station? The SCU integrated container solution integrates charging, integrated energy storage, power distribution, monitoring and temperature control systems ...

Discover how to design, deploy, and benefit from off-grid EV charging stations with solar panels, battery storage, and smart controls for reliable, sustainable charging.

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

This could power a tiny home or other small off-grid setup like a hunting cabin. For me though, I'll start with just keeping my electric tractors and motorcycles charged!
