---

The lines between communication infrastructure and distributed energy resources are blurring faster than we anticipated. As one engineer in Kenya's remote Marsabit region told me last month: "Our ...

Today, modular lithium-based energy storage systems have become the preferred solution for ensuring continuous operation, even under unstable grid or off-grid conditions.

Friday, 23 January 2026, 15:00 JST NEC Develops New 5G Base Station Radio Unit for Enhanced Communication Throughput, Compactness, and Energy Efficiency Thursday, 15 January 2026, 17:00 ...

The new device was developed in response to growing demand for communications traffic and increasing societal need for energy efficiency. It significantly improves both uplink and ...

For many regions still striving to close the digital divide, a stable, efficient, and intelligent base station system is far more than a communication tool--it is the gateway to education, healthcare, economic ...

As China rapidly expands its digital infrastructure, the energy consumed by communication base stations has grown dramatically. Traditionally powered by coal-dominated grid ...

The rise of 5G communication has transformed the telecom industry for critical applications. With the widespread deployment of 5G base stations comes a signific.

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative ...
