In this section, we spotlight 10 new companies in the microgrid industry offering solutions in power generation, battery energy storage systems (BESS), predictive control systems, and more.

What Is A Microgrid? Typical Microgrid Scope Microgrids Advantages The Jenbacher Approach When Reliable Power Supply Is Key Advantages of Co- & Trigeneration The Right Solution For Your Energy Source Flexible and Scalable Integrated Solutions Jenbacher can work on new microgrid projects or projects dedicated to modernizing existing microgrids. Flexibility is the key for integration purposes. Therefore, Jenbacher microgrid energy solutions can be supplied as modules for installation inside a building or as integrated solutions: containerized power generation or cogeneration/trigeneration... See more on Jenbacher Cummins Microgrid Power Solutions | Cummins Inc. See More Our range of diesel and natural gas generators are suited for all microgrid power generation requirements, ranging from 15 - 3,750 kVA. Advanced Microgrid Controls support multiple ...

Historical microgrid project cost data suggests that of the equipment expenses, conventional generation resources make up the bulk of the cost, followed by energy storage, renewable generation, and ...

Continuing the legacy of the already feature-rich Jenbacher master controller, INNIO Group's new Jenbacher microgrid controller integrates a wide selection of distributed energy resources (DERs) ...

Our range of diesel and natural gas generators are suited for all microgrid power generation requirements, ranging from 15 - 3,750 kVA. Advanced Microgrid Controls support multiple ...

Monitor and control your microgrids from anywhere with fleet-wide real-time status and data driven insights using the latest in AI and IoT technology.

With the ability to isolate from the primary electric grid, Eaton's microgrids provide load control and optimize energy usage. Eaton's turnkey services help customers develop and achieve a reliable ...

Advanced microgrids enable local power generation assets--including traditional generators, renewables, and storage--to keep the local grid running even when the larger grid ...
