---

In recent years, solar industry have become the world's leading edge. Inter-Tech creates new possibilities for solar C-type bracket with its unique sheet metal processing technology.

Shielden fixed photovoltaic brackets are made of high-strength aluminum alloy and galvanized steel, with excellent corrosion resistance and wind resistance, ensuring stability and reliability in various ...

Performance Advantages: High strength (tensile strength can reach over 345MPa) and strong load-bearing capacity, suitable for areas with high wind and snow loads; low cost and excellent value, ...

High strength and durability: The bracket of CHIKO Solar is made of high-quality steel or aluminum, which has excellent strength and durability and can withstand harsh weather conditions and external ...

Steel structures dominate 78% of global photovoltaic (PV) bracket installations, according to the 2025 Global Solar Trends Report. But what makes steel the go-to material for solar mounting ...

Photovoltaic brackets and solar PV brackets engineered for strength, corrosion resistance, and easy installation. Customizable to any panel size and delivered with expert technical support.

Material Selection and Exquisite Craftsmanship - The PV brackets from CHIKO are made of rigorously selected materials, such as corrosion-resistant aluminum alloy, high-strength carbon ...

Future Energy Steel offers a wide range of high-quality photovoltaic brackets specifically engineered for modern solar energy systems. Designed for durability and precision, our brackets ensure stability ...
