The executive order opens with a clear critique of federal subsidies for wind and solar energy. The administration's principal argument is that these subsidies have distorted energy ...

The European Commission launches an in-depth investigation into Goldwind, a Chinese wind power company operating in Europe: it may have received illegal subsidies.

Renewable energy, particularly wind and solar power, is receiving substantial subsidies in many countries worldwide. Unfortunately, wind and solar energy are unreliable and very expensive, ...

Section 1. Purpose. For too long, the Federal Government has forced American taxpayers to subsidize expensive and unreliable energy sources like wind and solar.

The extra layer of scrutiny for wind and solar contrasts with actions by the Trump administration to make it easier and cheaper for companies to produce oil, coal, gas and nuclear power.

First, they are no longer the nascent technologies they were when they started receiving subsidies. The two renewable sources have been cheap relative to natural gas-fired power without...

In the piece below, Jonathan Lesser traces the history of wind and solar subsidies in the US and why every dollar shovelled into the occasional generation of electricity is a dollar wasted.

To protect reliability, lawmakers should look to repeal the IRA extensions of wind and solar tax credits as a first step toward repairing the damage that these subsidies have done to ...
