With 900 MW of installed capacity, North Macedonia's solar sector is scaling rapidly, while battery storage is gaining momentum. Find out more in our daily focus, 15-18 September.

This article explores the current state of solar energy in North Macedonia, the opportunities for growth, and the challenges that must be addressed to maximize its potential.

News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

As the market for solar energy in North Macedonia continues to develop, such case studies highlight the potential for sustainable growth and innovation in the sector.

While hydropower traditionally dominated North Macedonia's renewable sector, PV systems have led the expansion between 2022 and 2024, marking an unprecedented growth period ...

Republic of Macedonia Solar PV Inverters Market is expected to grow during 2024-2031

In the sun-drenched fields of North Macedonia, farmers are turning to solar water pump manufacturers to solve two critical challenges: rising energy costs and water scarcity. As a leading provider in the ...

This paper describes the design and development of a solar photovoltaic (PV) inverter which is used to drive a water pump for irrigation purposes. The inverter output is fed to a three phase ac induction ...
