---

By installing local energy storage solutions that will function as energy buffers, we will, together with the local power supplier, help to provide a satisfactory power supply for residents and ...

Nordic Batteries" automated production process enables cost efficient battery production in Norway. At its facility in Kongsberg, the company has developed a world-leading robotic pilot line that boosts ...

Norway has a unique opportunity to serve Europe with high quality, sustainable and ethically produced batteries, but we must act fast as other countries are building renewable energy capacity and ...

Oslo's energy storage container processing sector is buzzing, and here's why: Target audience: Municipal planners, renewable energy developers, industrial facility managers, and curious ...

While not as dominant as hydroelectric storage, battery energy storage systems (BESS) are gaining traction in Norway for shorter-term storage and grid services.

What is a containerized energy storage system?The Containerized energy storage system refers to large lithium energy storage systems installed in sturdy, portable shipping containers, which usually ...

Our BESS holds immense potential for contributing to Norway's burgeoning clean energy landscape. Upon installation at the EV battery recycling facility, Hydrovolt, it will play a pivotal role in optimizing ...

Their innovative energy storage systems (ESSs) not only enhance vessel performance but also significantly reduce emissions, supporting the transition to zero-emission operations.
