What is a portable solar generator?

Portable solar generators have become a helpful and sustainable power source in a world where electricity is needed for day-to-day activities and emergencies. They are small devices that generate and hold power from the sun's rays, which makes them a practical substitute for gas-power generators.

How does a solar generator work?

A solar generator collects sunlight via the included panel, converts it to electricity, and stores it in a rechargeable battery to power various devices on demand--including both direct USB and traditional household outlets. Can I run major appliances? Match the watts and you're set: the Sidekick tops out at 300 W--great for phones or a mini-fridge.

Why do people use solar generators?

People are now using solar generators due to their reliability during power outages. They're especially useful due to poor weather conditions, unpredictable fuel prices, and older electric grids.

ORCHARD Solar Generation and BESS is a planned 500 MW battery project located in Yuma, AZ. The project is currently in planned status and is expected to come online in April 2027.
