What is a lithium-ion battery energy storage system?

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging technology in North America and is planned to be deployed in the City of Ottawa with the Ottawa BESS 2 Project.

How do Suppliers submit proposals for energy and capacity streams?

Through separate submission windows for the Energy and Capacity streams, suppliers are invited to submit proposals to meet the system's long-term needs and ensure reliable supply into the 2030s and beyond.

How many megawatts of electricity will Ottawa generate?

The recent round of electricity generation and storage procurement announced May 9 has secured a total of 2,915 megawatts of capacity -- enough to power the peak demand of 2.2 million homes, the province said in a press release. Jodie Applewaithe is an associate producer with CBC Ottawa. You can reach her at jodie.applewaithe@cbc.ca

Why are lithium ion batteries used in energy storage?

Lithium-ion batteries, the same batteries that are used in cell phones and electric vehicles, are the dominant form of energy storage today because they hold a charge longer than other types of batteries, are less expensive, and have a smaller footprint.

The long-awaited LT2 RFP follows on from the Ontario system operator's hugely popular Long-Term 1 (LT1) RFP, which resulted in the single biggest procurement of battery storage capacity ...

The Province, through the Independent Electricity System Operator (IESO), is currently engaged in the next phase of its energy procurement process, known as the Long-Term 2 Request ...

As part of efforts to adapt and modernize the electrical grid to support renewable energies, battery energy storage systems ("BESSs") are being increasingly incorporated into ...

The LT1 RFP procurement for electricity capacity has now concluded. The procurement has resulted in competitive prices for new resources, municipal support, and significant Indigenous participation and ...

Through this competitive procurement process, known as the Long-term 1 Request for Proposals (LT1 RFP), the province looked to procure year-round capacity from new build storage ...

Ottawa lithium energy storage power supply procurement

Source: <https://elalmacendelaireacondicinado.es/Fri-27-May-2022-23105.html>

“By enabling greater use of renewable energy, reducing emissions, stabilizing the grid, and empowering customers, battery storage is poised to help Ontario create a cleaner, more resilient, and equitable ...

The checklist items contained within are intended for use in procurement of commercial scale lithium-ion BESS, although they may be used more generally for other BESS technologies.

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging technology in North America and is planned to be deployed ...
