What are off-grid solar power kits?

The off-grid solar power kits include batteries, solar panels, a power center and your racking system. Complete kits are also available for grid-tied systems with a battery backup, RV and marine off-grid systems and remote industrial solar panel systems. Customize any kit with additional items that align with your project needs.

What does a solar power kit include?

Our grid-tied kits include solar panels, inverters and a racking system. The off-grid solar power kits include batteries, solar panels, a power center and your racking system. Complete kits are also available for grid-tied systems with a battery backup, RV and marine off-grid systems and remote industrial solar panel systems.

How much power does an off-grid solar system need?

Typically, we recommend kits ranging from 60 to 720 watts for smaller homes, depending on how many devices and appliances need power. If you'd like further information in order to make the optimal decision regarding your off-grid small home solar system kit, you can contact one of our specialists who can guide you through the process.

What is an off-grid Solar System?
