What is an outdoor telecom enclosure?

Our outdoor telecom enclosures support a wide range of telecommunications and infrastructure needs: Fiber Optic Networks: From compact fiber distribution units to high-capacity data center enclosures like the AP-Data with six slack frames, our cabinets manage dark-fiber volumes with organized cable management and secure slack storage.

Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.

What is a multitenant outdoor cabinet?

Viknor's multitenant outdoor cabinets enable multiple operators or equipment types to share the same protected infrastructure. Segmented internal layouts and isolated compartments ensure electrical and thermal separation, making them ideal for shared telecom or co-location sites. Get technical specifications and pricing tailored to your project.

Our top-grade enclosures provide safe and secure environments for critical electronic and communication components. Whether you need to house servers, switches, or routers, our telecom ...

AZE's weatherproof Outdoor Enclosures provide durable, corrosion-resistant protection for energy, telecom, and industrial applications. Customizable, NEMA-rated, and built for harsh environments.

We have extensive experience in making data communication and networking equipment, always provide quality outdoor distribution cabinet and enclosure for global customers.

Telecommunications enclosures can be installed indoors or outdoors, with wall-mount and pole-mount options. Our telecommunications & fiber splice enclosures can be customized to meet your ...

Measuring 50 inches high, 88.5 inches wide, and 42 inches deep, this enclosure offers up to 78 Rack Units

(RU) across three sets of standard 19" or 23" racking rails (26 RU each), with front-and-rear ...

Whether you need a compact fiber distribution unit or a large UPS enclosure, each outdoor telecom box can be configured to support integrated power, fiber optic, and data systems within our facility.

Learn how to match rugged connector interfaces with weatherproof outdoor enclosures for telecom and edge data centers. Ensure network reliability, uptime, and serviceability in harsh ...

Vikiner outdoor enclosures deliver proven reliability for mission-critical infrastructure. With modular construction, advanced protection, and configuration flexibility, they are ideal for global telecom and ...
