The complete turnkey solution, customized up to 5.4 MW, 40 ft. container with innovative forced air or air conditioned cooling systems for adverse environmental conditions

This model SES-1000/2000K- 40ft Container BESS is a large-scale energy storage solution housed in a standard 40-foot shipping container. The system can be used to store electrical energy for ...

The all-in-one liquid-cooled ESS cabinet adopts advanced cabinet-level liquid cooling and temperature balancing strategy. The cell temperature difference is less than 3°C, which further improves the ...

Our alfanar Photovoltaic container is supplied fully equipped with photovoltaic central inverters (1000V or 1500V), oil-filled hermetically-sealed LV/MV transformer, Ring Main Units (RMU), low voltage cabinet ...

Designed for outdoor deployment, the cabinet features weather-resistant construction, efficient ventilation or air conditioning, and options for battery and DC distribution integration. With robust ...

Dedicated to photovoltaic (PV) systems, this cabinet protects solar inverters from weather, dust, and physical damage while organizing wiring and components. Engineered to accommodate two ...

Housed in a 40-foot container, this unit combines advanced lithium battery storage with high-efficiency inverters and a streamlined architecture for seamless integration.

Peak shaving and valley filling: by charging and storing energy at valley time and discharging energy at peak time, the electricity cost of customers can be reduced and the electricity charge at the power ...
