Paris is taking vehicle-to-grid (V2G) tech to new heights. The 15,000 municipal EVs now function as a distributed storage network, adding 75MWh of flexible capacity during emergencies.

Construction is nearing completion on the 110-megawatt (MW) battery storage facility at the 200-MW Paris Solar-Battery Park in Kenosha County. The battery is expected to come online ...

As the 2024 Olympics demonstrated with its 100% renewable-powered venues, Paris isn't just keeping pace with energy storage--it's setting the global standard. The city's storage capacity grew 185% ...

Why the Paris CAES Project Matters for Our Energy-Hungry World deep beneath the romantic streets of Paris, an engineering marvel quietly stores enough energy to power 300,000 ...

While tourists joked about athletes needing portable generators, France's energy sector was already sprinting toward a solution: large-scale energy storage power plants.

The storage facility is made up of batteries capable of powering more than 130,000 homes for four hours, according to a news release. On sunny days, the batteries store excess power and ...

You know, Paris isn't just about croissants and the Eiffel Tower anymore. Over the past 18 months, the city's energy storage manufacturers have installed enough battery capacity to power 400,000 homes ...

The Eiffel Tower lit entirely by wind power on a breezy night, while croissant ovens hum with solar energy by day. This dream requires what engineers call a "grid-scale energy shock ...
