---

A large-scale solar and battery energy storage project in the Philippines is moving forward faster than expected, with 54% of the first phase completed just eight months after construction began.

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery energy ...

Department of Energy (DOE) said that the Philippines is exploring innovative solutions to optimize renewable energy integration and reduce costs, with Battery Energy Storage Systems (BESS) ...

The passage of Republic Act No. 11234, entitled "Energy Virtual One-Stop Shop (EVOSS) Act" on 08 March 2019 paved the way for streamlining and expediting the permitting ...

The company's cascaded high-voltage energy storage system is adapted to the three major upgrade areas of the power grid and has been successfully implemented in energy storage projects in Inner ...

The Philippines Department of Energy (DOE) has outlined new draft market rules and policies for energy storage, a month after the country allowed 100% foreign ownership of renewable ...

This will help reduce investment risks and integrate smart technologies to create a more reliable and sustainable energy system. Ultimately, these efforts will increase the use of renewable energy and ...

Energy storage systems, such as batteries and pumped hydro storage, play a crucial role in storing excess energy generated from renewable sources like solar and wind. These systems help mitigate ...
