Can a contractor recommend a PV system size?

After the contract award, the Contractor can recommend PV system sizes at their discretion, as long as the total aggregated PV system size is within plus/minus 10% of the original estimate. Certain buildings can be added or subtracted, subject to Governmental approval.

What types of electrical plans are included in a PV system?

Electrical Plans, including single-line electrical diagrams showing utility interconnection and all devices comprising the PV system, including, but not limited to: PV arrays, combiner boxes, circuit breakers, disconnect switches, inverters, meters, timers, control devices, and other equipment comprising the complete system.

How big should a PV system be?

The Government estimates the total PV system to be X kW, and will only accept a proposal that is no less than 10% smaller than the estimates. After the contract award, the Contractor can recommend PV system sizes at their discretion, as long as the total aggregated PV system size is within plus/minus 10% of the original estimate.

When can a contractor inspect a PV system?

The Government Contracting Officer or the delegated Contracting Officer's Representative may inspect the PV systems at any time during construction or after the PV systems have been put into operation. The Contractor may be ordered to stop work, or shut the systems down, if unsafe conditions or code violations are noted.

The Federal Energy Management Program (FEMP) provides this tool to federal agencies seeking to procure solar photovoltaic (PV) systems with a customizable set of technical specifications.

To help streamline the federal on-site renewable power purchase agreement (PPA) process, the Federal Energy Management Program works with agencies and partners to assemble sample documents ...

The enclosed technical template language is intended to provide only example language for agencies to consider in the process of assembling a solicitation and ultimately a contract for privately financed on ...

The omnidirectional photovoltaic tracking bracket system is a complete set of patented solar power generation products developed and designed by Weineng Smart Energy for the ...
