Suitable for small contact applications (6mm x 6mm). Adhesion to a wide range of substrates including Kapton, tin, copper, aluminum, stainless steel, ITO and other metal substrates.

With over 30 years of experience in formulating specialty adhesives for electronic applications, AIT has developed a series of adhesive films and metals for tabbing without soldering.

Adhesives play a pivotal role in securing solar panels in various installations. Understanding the nuances of applying glue allows users to make informed decisions regarding the ...

We explain how silicon crystalline solar cells are manufactured from silica sand and assembled to create a common solar panel made up of 6 main components - Silicon PV cells, ...

Before delving into the advantages of silicone, it's essential to understand why adhesives and sealants are so crucial in solar panel applications. These materials are used to bond and seal ...

Learning the basics of solar panel wiring is one of the most important tools in your repertoire of skills for safety and practical reasons, after all, residential PV installations ...

This survey method actually measures the temperature and intensity of solar radiation and measures the power output of a solar panel, and the tools used are thermal sensors used to measure the ...

Attention to detail is key here. Apply a generous and even layer of adhesive on the back of the flexible solar panel. Make sure you cover everything, from corner to corner. Carefully align your panel with ...
