EPCG said that the meeting also discussed the possibilities of investing in solar and wind power plant projects, improving the electricity grid, as well as developing new energy storage models, which ...

Specializing in commercial and industrial energy storage since 2015, we serve clients across the Balkans and Mediterranean region. Our 20,000m<sup>2</sup> production facility in Podgorica combines ...

The project combines lithium-ion batteries with AI-driven energy management systems. Think of it like a smartphone battery, but scaled up to power 12,000 homes for 6 hours during outages.

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

Our mission is to raise awareness about the importance of sustainability in the building sector, improve the quality of life for Montenegrin citizens through environmentally friendly architecture, and support ...

Summary: Explore how advanced energy storage systems are transforming Podgorica's renewable energy landscape. Discover practical solutions for solar/wind integration, cost-saving strategies, and ...

Imagine giving retired electric vehicle batteries a new purpose - that's exactly what second-life battery energy storage systems (BESS) are achieving in Podgorica.

Montenegro is making waves in renewable energy with its first distributed energy storage project. This innovative solution addresses grid stability, supports renewable integration, and paves the way for ...
