This paper develops a method to consider the multi-objective cooperative optimization operation of 5G communication base stations and Active Distribution Network (ADN) and constructs a description ...

How to ensure the compatibility between the inverter and other systems of the communication base station? The key to ensuring compatibility is to consider when selecting an ...

Dive into the research topics of "Energy-efficient 5G cloud RAN with virtual BBU server consolidation and base station sleeping". Together they form a unique fingerprint.

Therefore, 5G macro and micro base stations use intelligent photovoltaic storage systems to form a source-load-storage integrated microgrid, which is an effective solution to the energy consumption ...

This research delves into an integrated sensing and communication (ISAC) system, which leverages a ship-based station to simultaneously offer maritime communication services and ...

To further explore the energy-saving potential of 5 G base stations, this paper proposes an energy-saving operation model for 5 G base stations that incorporates communication caching
