---

Build high-quality lithium battery packs with automated production equipment, complete process development, on-site installation, and lifetime technical support.

Comprehensive battery testing equipment, formation/grading systems & automated PACK production lines for new energy industry. Custom solutions available.

Explore the advanced machinery and the techniques behind consistently manufacturing world class custom battery packs.

1. Improve production efficiency: The automated production line can greatly improve the production efficiency of power battery pack, reduce manpower operation and production cycle, and ...

With their ability to efficiently store large amounts of energy temporarily and then make them available as needed, battery systems in the form of battery modules and battery packs play a key role in the ...

PIA offers equipment for every stage of the value chain - not only paving the way for the production of efficient, high-quality batteries and electric vehicles, but also supporting future industry growth.

Learn the complete battery pack manufacturing process, from cell selection to final assembly.

For cell/module pack assembly, PIA Automation offers flexible and highly automated systems for the efficient production of battery cells, modules, and battery packs. These systems are scalable, ...
