---

Its 7th Strategic Energy Plan, released in February 2025, projects solar to rise from its current 10% share of electricity generation to between 23% and 29% by 2040, more than any other ...

The generation cost is higher than solar for the time being, but PPA contract prices may be reduced by applying Feed-in Premium (FIP). In virtual PPAs, the cost fluctuation for consumers due to wholesale ...

For fiscal year 2025, the FIT price of electricity that is generated from solar energy in Japan was set at ten Japanese yen per kilowatt hour. The feed-in tariff (FIT) system is a national...

This report studies the cost structure for solar PV in recent years based on a questionnaire-centered survey, and analyzes the generation cost of solar PV in Japan.

Demand is surging from every major consuming segment in the Japan solar power generation market.

The Ministry of Economy, Trade and Industry (METI) will set various details related to the FIT and FIP schemes, including the surcharge rate for FY2025 and the renewable energy purchase ...

The Japanese Ministry of Economy, Trade and Industry has announced new feed-in-tariff (FIT) rates for solar installations in residential, and commercial and industrial (C& I) segments for the ...

Faster permitting for rooftop arrays, mandatory on-site generation rules in Tokyo, and falling module plus battery prices have enlarged the addressable base for distributed systems.
