What is pvoutput?

Welcome, PVOutput is a free service for sharing and comparing PV output data. If you own a solar system please contribute your power output readings. Don't have a login? Register in 10 seconds. Forgot Password?

How can I monitor the progress of my pvoutput configuration?

You can monitor the progress in the PVoutput tab of the Status display. PVoutput allows reloading of historical data subject to lookback limits and maximum transaction rates. Once you are confident that your configuration is correct and uploading what you want, you can upload whatever historical data may be in your data logs.

Does pvoutput offer a free API quota?

For free, PVOutput.org gives you 60 API requests per hour. In a single API request you can download one day of data for one PV system. (See PVOutput's docs for more info about rate limits.) Donating to PVOutput.org increases your API quota to 300 requests per hour.

How much does it cost to donate to pvoutput?

Donating to PVOutput.org increases your API quota to 300 requests per hour. To get more historical data, you can pay \$800 Australian dollars for a year's 'Live System History' subscription for a single country (more info here).

It is a worldwide catalog of installed PV sites containing details of location, output, capacity, and efficiency. Individually, you can maintain data about the production of one or more sites along with ...

This Project presents a script written in the Python language that can be used to scrape data from the pvoutput site. It uses the Selenium webdriver to log in the user and navigate pages, and it uses ...

The live or intraday page displays both a graph and tabulated data of a live system in 5 to 15 minute intervals. The intraday page displays generation, consumption and net data.

It expects the input data and a dict of configuration parameters, which are described in the table below: This is a python type object to match against the field type. This defines if the field is required.

A service to provide and compare PV output data for those that own PV solar.
