India achieved 100 GW of solar capacity as of January 2025, aiming for 500 GW of renewable energy by 2030. Solar energy now contributes 47% of total installed renewable capacity, ...

India's solar energy sector has undergone remarkable transformation, driven by robust government policies and a commitment to renewable energy. As of August 2024, India's installed ...

OverviewSolar potentialHistoryInstallations by regionInstallations by applicationConcentrated solar powerHybrid solar plantsSolar heatingThe solar power potential of India is assessed at 10,830 GW in 2025. With about 300 clear and sunny days in a year, the calculated solar energy incidence on India's land area is about 5,000 lakh crore (5,000 trillion) kilowatt-hours (kWh) per year (or 5 EWh/yr). The solar energy available in a single year exceeds the possible energy output of all of the fossil fuel energy reserves in India. The daily average solar-power-plant generatio...

The study estimates India's total solar potential at 10,830 gigawatts (GW), far exceeding previous assessments while identifying new opportunities across both conventional and innovative ...

With 100 GW solar power achieved, India is moving towards energy independence and a greener future: Union Minister Pralhad Joshi. India has achieved a historic milestone by surpassing ...

India Marching Ahead in Solar Energy Growth in Solar Installed Capacity (MW) as on 11.02.2025 Figures and Statistics

A new report by Ember reveals that India curtailed 2.3 TWh of solar power between May and December 2025 to maintain grid stability, leading to significant economic and environmental ...

# Excluding Nuclear Capacity of 100 MW, which is under outage for very long time, and have been removed temporarily w.e.f. 31.05.2025. For more details, Click below.
