Renewable-powered containerized battery exchange at Suez, Panama, and Gibraltar can economically electrify shipping routes.

Many customers explore off grid solutions due to the simplicity and maneuverability of our containers. As long as a truck can get to the plot of land, we can drop your container. Now you have the option to go ...

Essentially, the scalable platform converts and stores energy to provide continuous power up to 600 volts at sea, in port, or anywhere off-grid. It reduces operating costs, optimises energy ...

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

Discover how solar energy is being integrated into cargo ships to reduce fuel consumption, cut emissions, and pave the way for sustainable maritime transport. Learn about the ...

Designed to combine multiple renewable sources--such as solar, wind, wave energy, and hydrogen fuel cells--these systems are transforming how off-grid marine vessels generate and ...

An energy management system optimizes the flow of power between an auxiliary battery bank and the ship's electric grid. The system fits into a shipping container, making it ideal for use in ...

The Maritime Technology Cooperation Centre (MTCC) Pacific supported the trial of marine solar power systems on two ships to power electricity needs, especially when in port. This resulted in overall ...
