In 2024, 24 states and territories generated more than 5% of their electricity from solar, with California leading the way at 32.4%. The United States installed approximately 31.1 GWh (12.3 ...

Delivered quarterly, the US Energy Storage Monitor from the American Clean Power Association (ACP) and Wood Mackenzie Power & Renewables provides the clean power industry ...

The global solar energy storage market was valued at USD 93.4 billion in 2024. The market is expected to reach USD 378.5 billion in 2034, at a CAGR of 17.8%, driven by growing energy demand across ...

It examines the current state of solar power and related academic solar energy research in different countries, aiming to provide valuable guidance for researchers, designers, and policymakers ...

Data from SEIA's annual Solar Means Business report show that major U.S. corporations, including Meta, Amazon, Google, Apple, and Walmart are investing in solar and storage at record levels.

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

For solar-plus-storage--the pairing of solar photovoltaic (PV) and energy storage technologies--NLR researchers study and quantify the economic and grid impacts of distributed and ...

Emerging technologies, decreased costs of storage solutions, and a heightened awareness of sustainability are converging, creating fertile ground for solar energy storage ...
