Romania's revised NECP draft outlines modest growth targets for solar power capacity but this below the country's solar potential and lacks specificity and concrete measures for achievement. Proposed ...

Outdoor energy storage systems are revolutionizing how Romania manages power reliability across industries. This article explores tailored solutions for renewable integration, industrial resilience, and ...

Romania's Solar Energy Landscape In the heart of Eastern Europe, Romania's renewable energy sector is booming. You've probably heard the stats: solar capacity grew by 34% last year. But ...

This diverse portfolio of projects showcases the scalability, adaptability, and potential of solar energy in meeting Romania's energy needs. The cumulative installed capacity represents a significant step ...

Romania's renewable energy sector is booming, with solar and wind projects driving demand for outdoor energy storage cabinets. These systems are critical for stabilizing grids and storing excess power. ...

Driven by EU funding, simplified permitting, and the launch of Romania's first Contracts for Difference (CfD) scheme, solar is becoming a central pillar of the national energy mix-- occasionally overtaking ...

Romania is aiming to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW of capacity by 2026. Energy Minister Sebastian Burduja announced ...

Neomar Consulting carried out, between March-May 2025, the 4th edition of its market study in the field of photovoltaic systems and solar electricity in Romania.
