---

UGT Renewables is working with Serbia's EPS to provide a series of self-balanced utility-scale solar projects, including battery storage, to every corner of Serbia.

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play designs ...

This messy situation's exactly why solar container solutions are getting serious attention ahead of 2025. Serbia currently imports 40% of its electricity while sitting on 2700+ annual sunshine hours - talk ...

An implementation agreement is in place between Serbia's Ministry of Mining and Energy, utility company Elektroprivreda Srbije (EPS) and a consortium of Hyundai Engineering and UGT ...

Summary: Discover how customized lithium batteries are transforming electric tool performance in Novi Sad's industrial and construction sectors. Learn about market trends, technical advantages, and real ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar.

With advanced lithium-ion battery technology and intelligent control system, our eBESS battery container offers a scalable and modular energy storage solution that is easily expandable as energy ...
