Table salt accounts for 90% of the sodium in the U.S. diet. Sodium helps balance fluid and electrolyte levels in the body. This balance can affect blood pressure and kidney and heart health.

The Blue Rack is the world's first sodium-ion battery cabinet designed for mission-critical applications such as data centers, peak power-shaving, and other industrial power environments.

How are these stationary market segments ripe for a sodium-ion takeover? Here are some reasons why this battery chemistry could be a great option for FTM, BTM, and portable energy ...

The sodium-ion battery module has self-recovery from failure, real-time battery cell equalization function, and provides protection functions such as overvoltage, undervoltage, overcurrent, short-circuit, and ...

Adults should aim for 1,500-2,300 mg of sodium per day. Most Americans consume too much sodium, increasing the risk of heart disease and stroke; aim for 1,500 mg and no more than ...

Under its agreement with Texas-based energy provider Jupiter Power, Peak Energy will provide 4.75 gigawatt-hours of sodium-ion battery energy storage systems (ESS) for deployment between...

Highjoule's sodium-ion energy storage solution offers a safer and more thermally stable alternative to lithium-ion systems.

Our customizable floor-standing cabinet solution is engineered to meet modern energy challenges with long lifespan, outstanding cold resistance, and a competitive sodium ion battery price that makes ...
