-----

Transform shipping containers into battery energy storage systems (BESS). These containers can house batteries for storing excess energy generated from renewable sources such as solar or wind ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, including hybrid and microgrid compatibility.

Drawing on our extensive industry experience, including the deployment of hundreds of off-grid solutions over the past decade, we have gained insights into contemporary solutions involving solar and ...

We can expand battery capacity, add ground-mount solar arrays, configure for three-phase commercial power, integrate backup generators, or build multiple-container systems.

Discover solar container solutions with 10-year warranty, IP65-rated LiFePO4 battery storage, and integrated solar panel systems for commercial use.

These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells -- with optional diesel redundancy when regulatory or client requirements demand it.

Explore SolaraBox's solar container product lineup--modular, scalable, high-efficiency systems. Download specs, compare models, request quote.
