---

As we've seen, the Bridgetown model isn't just another power station - it's a blueprint for sustainable development. By bridging the gap between renewable potential and practical implementation, these ...

Photovoltaics and basic energy sciences are two major areas of research conducted in the Solar Energy Research Facility. The facility enables advanced material synthesis for silicon, ...

This article was written by Erin Tansey and Flaubert Mbiekop from the International Development Research Centre (IDRC). It draws on insights from IDRC's funded Clean Energy for ...

NLR's solar energy research leverages our expertise--from materials to systems to commercialization--to continually improve the affordability, performance, and reliability of this ...

View the Solar Energy Technologies Office (SETO) solar energy funding programs past and present, including funding amounts and year announced.

The Solar Energy Research and Development is designed to fund research, development, demonstration, and commercialization activities to improve solar energy technologies.

Explore each of the research areas below and the research topics within them. You can also learn about the basics of solar energy and find solar energy resources.

Ever wondered how a small coastal city became the poster child for solar thermal innovation? Meet Bridgetown Solar Thermal Storage, the game-changing system turning sunshine ...
