-----

Romanian transmission system operator Transelectrica has announced a tender for a battery energy storage project with a 35MW power output and 70 MWh storage capacity. [pdf]

Students use SOLAR to register for classes, print schedules, view and pay bills, update personal contact information, view transcripts, and submit student employment timesheets.

In 2011, a report by the International Energy Agency found that solar energy technologies such as photovoltaics, solar hot water, and concentrated solar power could provide a third of the world's ...

Designed to store excess solar and wind power, this facility addresses what industry experts call the "sunset dilemma" - the gap between peak renewable generation and evening energy demand.

No, it's not sci-fi - it's called Moroni Pumped Hydro Energy Storage, and it's quietly revolutionizing how we store renewable energy. Imagine two reservoirs, one uphill and one downhill, ...

The energy storage photovoltaic power station near Moroni represents a critical step in Comoros' clean energy transition. By combining solar generation with smart storage, it addresses both energy ...

Virtually nonpolluting and abundantly available, solar power stands in stark contrast to the combustion of fossil fuel and has become increasingly attractive to individuals, businesses, and ...

Solar energy is radiant energy from the sun--a fully renewable energy resource. We use the solar resource to provide daylight, electricity, and heat in four ways (in order of prevalence):
